

## It-Technology

Let today's technology drive your future career

It-Technology is more than 0's and 1's, It and system network. This education will take you further than that and provide you with the tools to engage a more collaborative and outgoing career. Perhaps as an It-consultant, an It-advisor, or as a self employed consultant.

Involving users in a particular It-structure requires skills in sales, innovation, communication and marketing. All of which, are points of focus in the It-Technology education and when combined, they create a broad and usable knowledge that strengthens your professional toolbox.

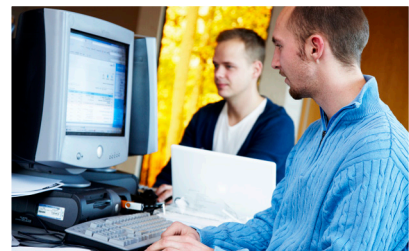

### Teaching methods

The teaching methods include lectures in classes of up to 30 students, group work, project work and interdisciplinary case work. We apply the theory to actual business cases to enable you to see the practical use of the theoretical learning. The It-Technologists are capable of using their studies directly in real life.

DANISH ACADEMY OF  
BUSINESS AND TECHNOLOGY

- Planning
- Innovation
- Network
- Sales and service

2-year programme  
in Viborg

# Possibilities

– closer to an international career

## Career options

Are you into setting up networks or consulting companies about their needs? If you are into both, maybe you should consider our It-Technology education.

This education prepares you for two roles; the consultant and the technician. We offer classes in general education, business and technology to give you a great skill base for a number of job positions such as Project Manager, Consultant or Network Technician.

## Admission

EU students with an upper secondary school diploma or equivalent may apply for studies. You must have good skills in English and Math. We interview all applicants prior to final admission. Requirements from other parts of the world may vary. Non-EU students must take a formal language test e.g. IELTS.

## Program

1st semester	2nd semester
Technological projects	Network Design Strategies
3rd semester	4th semester
Service and Communication	Internship Final Exam Project

The education has a duration of 2 years and 120 ECTS points with 30 points per semester.

## Internship

During the 1½ years you will complete 3 semesters and earn 120 ECTS Points. You will experience 3 months internship – in Denmark or abroad and get valuable practical insight. We offer a number of internships in the USA and other countries.

## Contact
